DETAILED ACTION

General status

1. This is a Final Action on the Merits. Claims 1 - 20 are pending in the case and are being examined.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1, 4, 6 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Paw et al. [US 5,821,486].

Paw et al. disclose a resistance assembly comprising:

- a base [14, 20, 56 84];
- a switch assembly [12] mounted on said base;
- a lever [50] connected to the switch assembly to move the switch assembly between opened and closed positions;
- a pin [55] having a first and a second ends, the first end being connected to the lever; and
- a resistance member [82] connected to the second end of the pin, the resistance member contacting the base when the lever rotates to move the switch assembly between open or closed positions thereby

Application/Control Number: 10/732,816

Art Unit: 2832

preventing accidental movement of the switch assembly [column 3, lines 37-55 and column 4, lines 7-11].

Paw et al. disclose the claimed invention except for a portion [84] of the base is flexible and the pin [82] acting as resistance member is rigid. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the portion of the base rigid and the resistance member flexible, since it has been held that a mere reversal of the essential working parts of a device involves only routine skill in the art. [In re Einstein, 8 USPQ 167.]

Regarding claim 4, Paw et al. disclose base substantially U-shaped base [element 20].

Regarding Claim 6, Paw et al. disclose the instant claimed invention except for "said resistance member is a roller". The use of roller is well known in the art, and it would have been obvious to use a roller at the end of pin, so as to obtain better contact with element [84].

Regarding claim 7, Paw et al. disclose the pin [55] made from rigid material.

Regarding Claims 8 and 9, Paw et al. disclose the instant claimed invention except for material for the pin being thermoplastic material or delrin. It would have been obvious to one having ordinary skill in the art at the time the invention was made to select an appropriate material, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. [In re Leshin, 125 USPQ 416.]

Allowable Subject Matter

- 4. Claims 10-20 are allowed.
- 5. Claims 2, 3 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 6. The following is an examiner's statement of reasons for allowance:

Claim 2, recites "said bearing assembly capable of being moved radially relative to an axis of rotation", claim 3, recites "said bearing assembly is made of a flexibly material", claim 5, recites "a first leg of said u-shaped base prevents movement of said resistance member thereby", all define over the art of record.

In Claim 10, the combination of limitations including "a lever connected to said at lest switch assembly, a shaft connecting each of the levers, pin connected to one of the levers and resistance member connected to second end of the pin, the resistance member contacting the base" define the claim over the art of record.

Response to Arguments

7. Applicant's arguments with respect to claims 1 - 9 have been considered but are most in view of the new ground(s) of rejection.

The rejections in the previous office action under 35 USC §112, second paragraph are withdrawn in view of Applicant's amendments.

The Applicant amended claim 1 and changed "a base" to "a rigid base" and "said roller" to "said resistance member". Claims 1, 4 and 7 are now being rejected under 35 USC § 103.

Application/Control Number: 10/732,816 Page 5

Art Unit: 2832

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marina Fishman whose telephone number is 571-272-1991. The examiner can normally be reached on 7-5 M-T.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Elvin Enad can be reached on 571-272-1990. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
